### What is ICD-10?

The *International Statistical Classification of Diseases and Related Health Problems - Tenth Revision* is the most recent revision of an international core classification of diseases, injuries, and causes of death. The *World Health Organization* (WHO) is responsible for maintaining and revising ICD-10.

Over time, the use of ICD has expanded. It is now used by many countries in hospitals, doctors' offices and health care facilities to record non-fatal diseases, symptoms and other conditions necessitating contact with health care providers for medical services.

### What is ICD-10-CA?

With the approval of Health Canada, the *Canadian Institute for Health Information* (CIHI) has received permission to enhance the international classification to meet Canadian needs within the requirements of its licence agreement with WHO.

The list in Appendix A represents a sub-set of ICD-10-CA codes. The complete list is available from CIHI. ICD-10-CA is a copyright product of CIHI and may not be changed without their express permission. Providers should contact their associations for guidance with coding.

Providers and software vendors can purchase products and publications related to coding directly from CIHI at [www.cihi.ca](http://www.cihi.ca), including:

- ICD-10-CA/CCI, 2003 (CD-ROM - Single user)  
This product is similar to the popular CD-ROM encyclopaedias. The infobase automatically indexes every word, and users may find information quickly using the software's search engine.
- Code Title Tables 2003/2004 (for use with ICD-10-CA/CCI)  
The code title tables include all the valid diagnosis and intervention codes and their descriptions.

### ICD-10-CA Code Structure

| ICD Base<br>(Mandatory) |              | ICD Sub-Category<br>(Optional) |
|-------------------------|--------------|--------------------------------|
| Position 1              | Position 2-3 | Position 4-6                   |
| Series                  | Category     | Sub-Category                   |

#### Series (position 1)

The **Series** code represents a broad category of disease, condition, injury, disorder, or symptom. Codes are grouped within a series based on:

- body system or anatomy (e.g., respiratory, circulatory)
- cause or etiology (e.g., injuries, infections)
- circumstances (e.g., pregnancy)

### **Category (position 2-3)**

The **Category** code provides general details to describe the injury, disease, disorder, symptom or condition. The meaning of each position within Category Code varies from series to series.

### **Sub-Category (position 4-6)**

The **Sub-Category** code provides specific details related to the injury, disease, disorder, symptom or condition. Generally, this level of detail is not required for automobile insurers.

### ***Most Significant Injury/Sequelae Code***

The most significant injury/sequelae code is the one code that describes the most significant condition of the patient that is directly related to the automobile accident, which causes the need for health care services. In a case where multiple injury codes may be classified as most significant, code the injury requiring the most services. If no diagnosis has been made, the main symptom, abnormal finding or problem should be selected as the most significant injury.

If no injury is found, use code Z00 (General examination and investigation of persons without complaint and reported diagnosis).

### ***Presentation Format***

The presentation format for an ICD-10-CA code includes a decimal after the third character in valid four, five and six character codes. Valid three character codes do not include the decimal.

For those non-ICD-10-CA codes developed specifically for automobile insurers, the asterisk need not be coded nor stored. The asterisk must be shown on any list of codes or reports displaying or exhibiting the asterisked codes.

### ***Data Storage and Transmission***

Decimals and asterisks should not be included in machine-readable data.

The current maximum length of an ICD-10-CA code is 6 alphanumeric characters.

### ***ICD-10-CA Code List***

The following list is a sub-set of ICD-10-CA codes. ***It neither endorses nor precludes the use of any ICD-10-CA code.*** Codes should be selected based upon the guidance from provider associations, the appropriateness of a specific code for a particular clinical situation, and guidelines provided by the Canadian Institute for Health Information.
